

DAVID *Stand*

The DAVID Stand - somewhat different, naturally.

Which loudspeaker stand could do justice to the unique all aluminium- DAVID loudspeaker? No one could do it, so another project was started. Visonik started from scratch and paramount were these parameters: **Appearance Functionality Stability**. Finally we settled for a combination of **natural wood** and aluminium. Eye pleasing yet functional, especially since the DAVID's casing is made from solid aluminium. A groove in the backside of the stand allows you to hide the cables from sight. The **cast iron base** gives you perfect stability. Made exclusively for the David, a classic from Visonik.

VISONIK - Ideen die man hört!

Technical Data:

Height	1050 mm
Width	360 mm
Depth	360 mm
Weight	ca. 5 kg
Colours	Cherry/Black
